• Assesses 5 domains: Cognitive, language, motor, social-emotional and adaptive behaviour • Adaptive behaviour content from the Adaptive Behavior Assessment System -Second Edition (ABAS-II)	• Retains 5 domains: Cognitive, language, motor, social-emotional and adaptive behaviour • Adaptive behaviour content from the Vineland Adaptive Behavior Scales–Third Edition (Vineland-3) • Updated item content based on research and user feedback
Norms and Clinical Studies	
• Data collected 2001–2002	• Data collected 2017–2019 • Updated reliability and validity studies
Norms Age Bands	
• 10-day age bands up to 5 months • 1-month age bands from 6 months to 35 months • 3-month age bands from 36–42 months	• 10-day age bands up to 6 months • 1-month age bands from 7–42 months

Pearson

Bayley Scales of Infant and Toddler Development™ THIRD EDITION	BAYLEY 4 Scales of Infant and Toddler Development™ Fourth Edition
Digital Delivery	
• Software-based scoring and reporting assistant available	• Web-based administration, scoring, and reporting via Q-global • Social-Emotional and Adaptive Behavior Questionnaire has remote administration option via Q-global

The key benefits of the digital delivery option:

Q-global®

- **Customization**
  - Adjust start point based on estimated due date if child was premature
- **Flexibility**
  - No need for a separate record form or administration manual
  - Supports non-linear and related-items administration
- **Ease of use**
  - Messaging included to guide establishing basal and meeting discontinue rules
  - Contains visual representation of administration directions and examples for complex items
  - All series items are simultaneously scored based on a single response
- **Accuracy**
  - A review screen helps to ensure all required data is captured prior to submitting the assessment
  - Item score suggestions are provided based on when the timer is stopped or the number of correct responses to trials
