## A new standard in adolescent personality assessment

The MMPI-A-RF™ is the most up-to-date, empirically based personality assessment for use with adolescents. The test mirrors the structure of the MMPI-2-RF®—the most recent version for use with adults. The MMPI-A-RF is composed of 241 items and is linked to current models of psychopathology and personality.

### Key features and benefits

- 48 empirically validated scales relevant for use with adolescents in a variety of clinical, forensic, and school settings
- Shorter test length reduces the administration burden on adolescents
- Concise and transparent interpretation guidelines
- Customizable options provide greater reporting flexibility for clinicians
- Comparison groups allow for an additional level of interpretation across several settings

### Scoring and Reporting

Administration, scoring, and reporting for the MMPI-A-RF is available on Q-global®.

Q-global offers flexibility and convenience in a web-based system; administer, score, and generate immediate reports for the MMPI-A-RF from any device connected to the Internet.

For more information about Q-global, please visit **HelloQ.ca**.

Q Local™ administration, scoring, and reporting and Mail-In scoring and reporting are also available.
