Assess receptive and expressive vocabulary with confidence...

...and link to evidence-based interventions!

Introducing the **Peabody Picture Vocabulary Test™, Fifth Edition (PPVT™-5)** and the **Expressive Vocabulary Test™, Third Edition (EVT™-3)**, a set of single word receptive and expressive vocabulary tests.

For over 50 years, the PPVT has been trusted to quickly and easily measure a key language ability—vocabulary. When combined with the expressive vocabulary measurement of the EVT, the scores provided allow you to make direct comparisons and interpret vocabulary performance as it relates to oral language and the broad vocabulary basis for reading and writing.

While these tests are just as quick, easy, and reliable as ever, the PPVT-5 and EVT-3 have undergone some updates that make them even more efficient and relevant to today's needs. With updated artwork, parallel forms, several word-type analyses, and available digital administration on Q-interactive®, it's time to give the PPVT and EVT another look!

The PPVT-5 and EVT-3 offer professionals flexible options when completing screening and diagnostic evaluations as part of:

- an overall cognitive battery
- a language evaluation anywhere across the lifespan
- a reading assessment process
- annual progress monitoring

The PPVT-5 is a norm-referenced and individually administered measure of receptive vocabulary based on words in Standard American English.

Use the PPVT-5 to:

- Quickly evaluate receptive vocabulary with a test that requires no reading or writing
- Meet guidelines for universal screening, identifying strengths and weaknesses, and diagnostic testing in an RTI environment
- Monitor progress using two parallel forms
- Directly compare receptive and expressive vocabulary when administering the EVT-3
- Identify areas for improvement and move immediately into evidence-based interventions using The Bridge of Vocabulary™ 2—all within the Q-global® scoring and reporting system
- Assess advanced vocabulary for gifted & talented programming or with high-functioning autism

The EVT-3 is a norm-referenced and individually administered test of expressive vocabulary and word retrieval based on words in Standard American English.

Use the EVT-3 to:

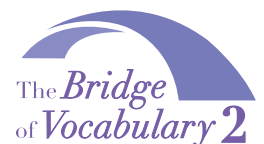

- Quickly evaluate expressive vocabulary with a test that requires no reading or writing
- Make direct comparisons with receptive vocabulary to pinpoint a student's strengths and weaknesses using the Q-global Receptive-Expressive Comparison Report
- Measure progress with use of two parallel forms
- Identify areas for improvement and move immediately into evidence-based interventions using The Bridge of Vocabulary 2—all within the Q-global scoring and reporting system

The Bridge of Vocabulary, Second Edition

The Bridge of Vocabulary 2 is a completely digital, evidence-based set of vocabulary activities designed specifically for both general and special education professionals. Interventions can be purchased for 5 different age and/or skill appropriate ranges—over 125 activities in all!

Use The Bridge of Vocabulary 2 to:

- Provide targeted instruction and interventions for all students in a classroom setting, students with language and learning disabilities, students with complex communication disabilities, and across all service delivery models
- Collaborate with other disciplines in vocabulary development, which is essential to listening, speaking, reading and writing success
