

A comprehensive, evidence-based system that supports the need to read

aimsweb®Plus Canadian Edition is a web-based formative assessment tool that enables educators to quickly and accurately:

- Screen all K-2 students with brief, valid, reliable measures
- Identify those at risk of literacy or reading gaps
- Enable early intervention
- Measure, monitor, document and report the impacts of intervention efforts

Bringing standards-aligned and curriculum-based measures together

aimswebPlus Canadian Edition uses a new battery of tests that provides composite scores, and includes both timed curriculum-based measures (CBMs) plus untimed standards-based measures.

- Accurately assess student literacy and reading skills
- Determine the effectiveness of instruction/intervention
- Monitor students' progress
- Manage student assessment data

With its robust combination of CBMs and standards-aligned measures, you can screen and monitor progress for all students in grades K-2. Online scoring is available for grades K-1 and complete online administration is available for grade 2.

Measure what matters

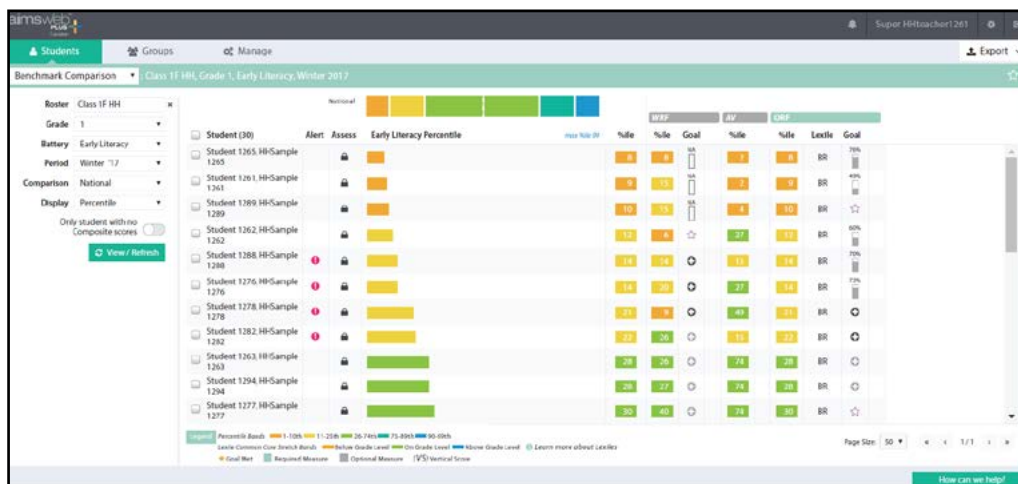

aimsweb®Plus Canadian Edition includes new measures that are compatible with any curriculum to assess skills in:

- Early literacy
- Reading, including vocabulary and comprehension
- Silent reading fluency

Establish accurate benchmarks

- Review individual student or group results on one dynamic screen
- Identify students at risk of not meeting grade level expectations
- Quickly monitor student progress
- Identify appropriate instructional tiers

Student-centered. Interactive. Intuitive. Data-driven.

Benchmark Comparison Summary

Monitor progress quickly and efficiently

- Manage monitoring caseloads on one screen
- View multiple measures for each student on one screen
- See the impact of intervention

Generate clear, actionable reports

aimswebPlus provides teachers with the most relevant data in the least amount of testing time by:

- Providing data from CBMs and standards-based measures in benchmark reports
- Including growth summaries to share with parents and students
- Displaying both student performance and progress
- Generating quartiles and lexiles
