

Social Distancing challenges? Digital administration offers key benefits!

Extraordinary times call for extraordinary solutions. The Digital Assessment Library, a solution that offers school boards unlimited use of over 40 assessments and interventions on **Q-interactive®** and **Q-global®**, provides many key benefits schools are looking for right now. The flexibility that the Digital Assessment Library for Canadian Schools provides for assessment administration while social distancing and through remote administration can make it easier to support your students while working within many current safety and healthcare guidelines. Three of these include easy cleaning of devices, social distancing for assessments, and remote administration.

Easy cleaning

- Hardware devices can be easily sanitized
- Fewer items to clean after sessions

Social distancing for face-to-face assessments

- Q-global® digital stimulus books can be shared on a second monitor placed a safe distance away from the examiner and used for test administration
- iPad® devices using Q-interactive® can easily connect at a safe social distance and through personal protective accommodations like plexiglass barriers

Remote administration

- Many Q-global tests can be administered via remote administration using the examinee's own device
- Digital stimulus books found on Q-global can be used during a telepractice assessment
- Q-interactive can be used, with some accommodations, during a telepractice assessment
