Introducing the Peabody Picture Vocabulary Test, Fifth Edition (PPVT™-5)

Main Research Goals:
• Update normative data
• Simplify administration process to save time
• Include item analyses that provide assessment to intervention connections
• Maintain the basic format of the PPVT–4 (e.g., two parallel forms, selection of stimulus word from four-picture layout)
• Refine the digital applications that will maintain the basic qualities of the PPVT–4 (e.g., ease of administration and response capture, brief administration time, accurate scoring)
• Refine items (for Form A and Form B) so that stimulus words and picture stimuli may be applied to differing cultures within Canada in the current day

Uses & Applications:
• Measure receptive vocabulary acquisition
• Monitor progress of receptive vocabulary acquisition using two parallel forms or the Growth Scale Value (GSV)
• Assess receptive vocabulary—as part of a comprehensive language evaluation—across the lifespan
• Screen or assess strengths and weaknesses in the specific domain of semantics (i.e., word knowledge) and general area of language development
• Directly compare receptive and expressive vocabulary when you also administer the EVT™-3
• Move immediately into evidence-based interventions using those embedded directly into and linked into the Q-global® system
