It’s time to take assessment to another Dimension

The TEA-Ch2 is the new edition of the gold-standard test for attention, which uniquely measures separable aspects of attention. TEA-Ch2 has been updated to make the testing process more fun and engaging for the child.

Overview
Gold-standard test of attention for children, which uniquely measures separable aspects of attention.

Scoring
Automated scoring including in the program

Administration
Ages 5 - 7 years: 30 - 40 mins
Ages 8 - 15 years: 40 - 55 mins

Age range
5 years to 15 years

New features and updates

- A shorter and more user-friendly tool using a unique combination of both paper-based and computerised tests
- Comic format for administration with certificate and stickers to engage children in shared fun activity with examiner
- Shorter, simpler age appropriate version for the younger children (TEA-Ch2J) and a longer version for the older children (TEA-Ch2A)
- Everyday attention index and selective and sustained attention indices capturing core abilities
- Large normative sample representative of the UK population
- Improved psychometric properties
- Range of application extended down to age 5 years

TEA-Ch2 will be particularly useful for use with children who have known or suspected problems with attention; to tell apart different patterns of strengths and weaknesses in cognition; inform interventions and monitor outcomes.

Test structure

Age 8 years to 15 years

</table>

New and Improved Psychometric Properties

UK standardisation carried out on:
- 621 children aged 8 years to 15 years
- 394 children aged 5 years to 7 years.

Regression based norms stratified by age, sex and family education.

New App-like Program for Administration and Scoring

Automatic scoring of computer subtests which:
- checks and calculates combined and total scores.
- provides scaled scores and percentile ranks to aid interpretation.
- automatically converts subtest scores to indices and overall composite scale.
- generates PDF output report of scores with percentiles, scaled scores and indices.
