

WISC®-V Canadian and WIAT®-III Canadian Comparisons

Pearson customers who have purchased the WIAT-III^{CDN} scoring software, and who are currently using the Q-global platform for their WISC-V^{CDN} scoring, are eligible for Q-global WIAT-III^{CDN} score reports for the purposes of running the AAD and PSW analysis, at no charge.

Upon qualifying, our Customer Care team (1-866-335-8418) will load WIAT-III^{CDN} score report credits to the existing Q-global account enabling the user to proceed as follows:

- run both your WIAT-III^{CDN} and WISC-V^{CDN} reports independently
- once the WIAT-III^{CDN} report status is "Report Generated" you will be able to re-run the report (no charge for re-generating reports) to add in the WISC-V^{CDN} comparisons

Please note, there is also the manual method for doing the AAD analysis (with Canadian norms), using the provided manual (Appendix E in the Canadian WISC-V manual). The PSW analyses would have to be done using Q-global however.
