## Performance Summary

| Score                              | Index Score | Qualitative Description | Classification Level |
|------------------------------------|-------------|-------------------------|----------------------|
| WAIS-5 General Ability Index (GAI) | 82          | Below average           | N/A                  |
| WMS-5 Delayed Memory Index (DMI)   | 86          | Below average           | N/A                  |

Classification Level is only provided for the WMS-5 Brief Cognitive Status Exam (BCSE), if available.

## Performance Validity Test Score Summary

| Overall Clinical Sample Base Rates |           |          |          |          |          |          |            |
|------------------------------------|-----------|----------|----------|----------|----------|----------|------------|
| Test                               | Raw Score | ≤2%      | ≤5%      | ≤10%     | ≤15%     | ≤25%     | >25%       |
| Word Choice                        | 43        |          |          |          | X        | X        | X          |
| LM 2 Recognition                   | 25        |          |          |          |          | X        | X          |
| VPA 2 Recognition                  | 35        |          |          |          |          | X        | X          |
| VR 2 Recognition                   | 13        |          | X        | X        | X        | X        | X          |
| DE 2 Recognition                   | 13        |          |          |          |          | X        | X          |
| Reliable Digit Span                | 7         |          |          |          |          | X        | X          |
| <b>Totals</b>                      |           | <b>0</b> | <b>1</b> | <b>1</b> | <b>2</b> | <b>6</b> | <b>---</b> |

## Performance Validity Test Score Analysis

| Group of Interest                 | Percentage with Matching Number of Cut Scores at Cutoff |    |     |     |     |
|-----------------------------------|---------------------------------------------------------|----|-----|-----|-----|
|                                   | 2%                                                      | 5% | 10% | 15% | 25% |
| No stimulus group                 |                                                         |    | 100 | 100 |     |
| Simulators                        |                                                         |    | 68  | 60  |     |
| Overall clinical sample           |                                                         |    | 30  | 16  |     |
| Traumatic brain injury            |                                                         |    | 74  | 52  |     |
| Nonclinical sample                |                                                         |    | 18  | 8   |     |
| Education level (8 years or less) |                                                         |    | 17  | 17  |     |
| Race/Ethnicity (African American) |                                                         |    | 23  | 11  |     |
| GAI (70-84)                       |                                                         |    | 32  | 23  |     |

Only five performance validity test scores are available for the No stimulus group. Refer to the manual for more information.
